

CLIMATE COMMUNITY PROFESSIONAL

Duration	Approx. 5 hours
Cost	950,00
Group Size	up to 20 People

LEARN FROM THE EXPERTS

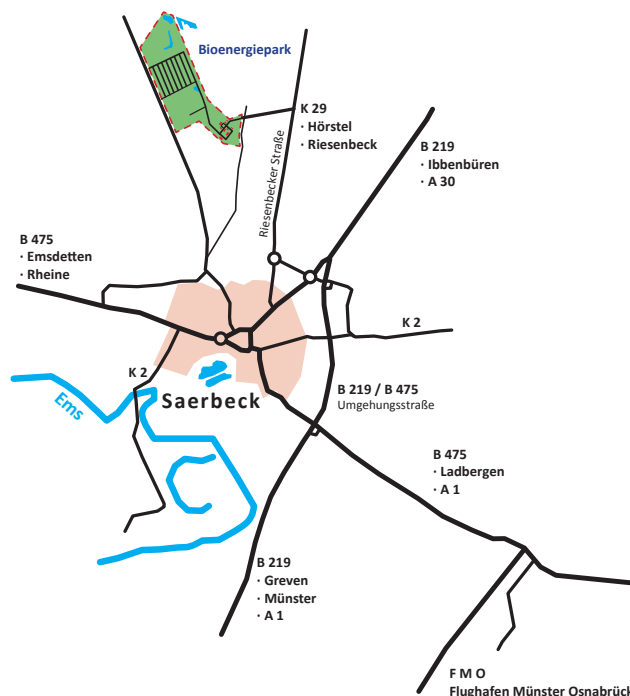

Transfer of knowledge for those interested and invested in science, politics, and civil society. A focus on the concept of Klimakommune Saerbeck and the application of professional know-how necessary for the successful transition of projects within the field of energy transfer. The dive into content includes different thematic focal points such as: value of citizen participation, wind energy (technology and operation), solar energy (from roof application to PV-PowerPark), heat transition (opportunities, potential, and challenges), heating (networks and systems), bioenergy and biomass utilization, sector coupling and flexibilization, electrical mobility, green hydrogen (potential and on-site production), role of municipalities and utilities, operators and social structures, research and development, education and know-how transfer, public relations...

If interested, included opportunities to discuss further thematic focal points. Specific topics and discussions may be individually decided. The tour will begin in the glass Heating Center in the middle of town and will continue throughout the different stations of the Bioenergy Park.

OPPORTUNITIES FOR CHILDREN AND YOUTH

Students (elementary school to highschool) can visit the Bioenergy Park's off-site school with Saerbeck Energyworlds to research, experiment, and discover how energy and environmental protection are intertwined. We offer unique teaching modules in the scope of energy and climate protection, sustainable transportation, and trash and recycling. We create exciting learning experiences! Individual events are also possible and can be confirmed after consultation. For more information, visit www.klimakommune-saerbeck.de or <https://www.energiwelten.org>.

QUESTIONS & BOOKINGS

All offers and sign-up forms are available at our homepage www.klimakommune-saerbeck.de under the "Führungen und Seminare" or "Guided Tours and Seminars" tab. You are also welcome to call us at 02574 89292 or contact us by email at info@saerbeck.de. We will gladly create an application and offer, with possibilities of a coffee break, lunch, an overnight, or included bike rentals.

Passionately sustainable!

GUIDED TOURS

*The Climate Community Saerbeck:
experiencing and exploring with experts*

PASSIONATELY SUSTAINABLE!

Together, we as Saerbeck are a leader of the local energy transfer. Sustainability and environmental protection define our mission statement. Since 2009, we have been taking steps to reach out goal of climate neutrality in 2030, and we have already achieved a lot. We generate more electricity from renewable resources than we require in the area. Saerbeck recognizes itself as a center for competence for renewable energy and welcomes guests from around the world. Our next goals, which we confidently approach, are transportation and heat transitions.

Climate Community Saerbeck: Passionately Sustainable!

EXPERIENCE THE CLIMATE COMMUNITY

We gladly share the behind the scenes because we want our projects to inspire and support others to participate actively in environmental protection. Therefore, our tours through the climate community are a foundational activity which play an important role in sharing information and educating others.

We offer themed presentations and workshops in which professionals explain general as information as well as project details of the climate community or tours of the Bioenergy Park, so that the information is accessible to everybody.

BIOENERGYPARK SIGHTSEEING

Duration	approx. 2 hours und 15 minutes
Cost	up to 20 people 120,00 €
Group Size	20 to 45 people 170,00 €

Starting at the entrance of the Bioenergy Park, the tour explores the development and transformation of the Bioenergy Park from the previous Munitions depot. Presented at different stations, the tour explores the different necessary technical investments. The central themes span from the generation of renewable energy through windpower, photovoltaics, bioenergy, and hydrogen, to climate- and nature protection, as well as the roles of education and research.

CLIMATE COMMUNITY COMPACT

Duration	approx. 3 hours
Cost	up to 20 people 250,00 €
Group Size	20 to 45 people 310,00 €

Starting at the town center by the glass Heating Center, the presentation covers the numerous projects and measures of the Climate Community in Saerbeck, and exchanges the necessary factors in creating a successful citizen-centered energy transition. For those interested, and to obtain a more diverse and detailed perspective, more information of technical solutions, participation, or community and organization structures can be discussed. Individual questions will be answered to discuss specific and unique group interests. These presentations are followed by a tour throughout the Bioenergy Park to explore themes of education and see the investment locations for renewable energy generation up close.
